

# Keyphrase Configuration

Last Modified on 05/16/2025 8:38 am EDT

## V1.1

### Overview

In the key-phrases.yaml configuration file you can define the key words/phrases based on which a document is searched and categorized. If a key phrase is associated with more than one category, only the first category it appears in will be considered for extraction.

Keyphrase configuration supports different languages.

### Template

```
kind: document
metadata:
  name: extraction/v1/documents/key-phrase
spec:
  categories:
    - name: Credit Invoice
      keyPhrases:
        - "Credit Note"
        - "Credit"
        - "Credit Memo"
        - "〆〆〆〆"
        - "Crédito"
    - name: Non AP Document
      keyPhrases:
        - "Purchase Order"
        - "Proforma Invoice"
        - "Statement"
        - "Receipts"
        - "Service Quote"
        - "Order Confirmation"
        - "Sales Order"
        - "〆〆"
        - "Declaración"
        - "Proforma"
    - name: Test-Invoice
      keyPhrases:
        - "invoice"
```

Parameter	Description
Name	The category name.
KeyPhrases	The key words/phrases to search and categorize a document.

For example, in the above template:

- name: Credit Invoice

keyPhrases:

- "Credit Note"
- "Credit"
- "Credit Memo"
- "เครดิต"
- "Crédito"

If the above mentioned key phrases are found for an invoice, then the invoice is categorized as a Credit Invoice.
